Bidfood Chepstow

In just 4 weeks, SOL Services designed and constructed a brand-new toilet and wash space within an existing locker room at Bidfood Chepstow, delivering a modern, efficient, and hygienic solution.

The project included the installation of wipeable white hygienic wall cladding and ceiling tiles, providing an easy-to-maintain environment. All lighting within the new space and surrounding corridors was upgraded to energy-efficient LED panels, complete with emergency fittings, transforming the area into a bright and contemporary facility.

This fast-tracked project was completed on time and to a high standard, meeting the client's needs for a durable and clean environment while enhancing the overall functionality of the space.
